

Dear ERGO, do you have space for me to continue expanding my skills and experience?

You can depend on that! At ERGO, you will find a wide range of areas to which you can contribute all your expertise and in which your potential will find the freedom you desire. At ERGO, one of the largest insurance groups in Germany and Europe, you will find a dynamic environment and challenging tasks in a wide variety of projects, giving you the opportunity to grow further. Break new ground with us! Our common goal: to offer our clients exactly what they need.

For our location in Düsseldorf we are looking for

## Senior Commercial Pricing Actuary (m/f/d)

### Your tasks

This role offers a unique opportunity to work at ERGO Group level on commercial & industrial lines actuarial pricing topics. You have the opportunity to work in a young, international and ambitious team to support the international property&casualty companies of ERGO. ERGO is one of the biggest European insurance companies with entities mainly in Europe and Asia. ERGO is part of the Munich Re Group, the world's largest reinsurer. In this position you will:

- Improve ERGO's global P&C actuarial pricing capabilities.
- Assist and consult domestic and international entities in pricing sophistication, help to steer an international, colorful portfolio.
- Act as advisor on commercial pricing topics, share advice with entities, other actuaries and underwriters
- Apply traditional pricing topics (risk modelling, actuarial benchmarking, profitability deep dives and tariff development) and develop emerging pricing topics such machine learning, credibility theory etc.
- Work on pricing projects from SME business where significant GLM modelling is required, up to ratemaking projects for large corporate risks, where exposure-based pricing and informed judgment from experience is needed.
- Collaborate with colleagues from other departments (including Munich Re) to ensure the pricing proposals are consistent with the wider corporate processes (NatCAT modelling, reserving, internal model etc.).
- Make sure that pricing best practices and rate benchmarks are shared for traditional commercial & industry business as well as for emerging products such as e.g. car sharing and cyber risk insurance.
- Prepare and complete pricing analyses, including the development of rates, ultimate loss projections and communication of results.

### Your profile

- 3-7 years or more of actuarial pricing or risk management experience in (mostly) commercial / industrial lines environment.
- Able to communicate complex topics in non-technical terms to a variety of stakeholders such as underwriters, line managers, product development or sales
- Proactive mindset, able to work project-based and advise junior actuaries
- Experience in using EMBLEM, SAS, R/Python, IGLOO and ResQ is an advantage.
- A good command of English is required to work in an international environment. Fluency in German is an advantage.
- You pursue a formal education or you are a member of an internationally recognized actuarial organization.
- Readiness for occasional international travel.
